Working Group on
Climate Change and Environment

Organization: UN PRME Working Group on Climate Change and Environment, UK

Title: Development of the Educational Toolkit for SDG 13

Objectives: Are you a forward-thinking student who's passionate about climate and environmental education? You may be a great fit for this project! Bringing together a diverse group of committed academics and practitioners from over 20 countries, the UN PRME Working Group on Climate Change and Environment focuses on SDG 13 'Climate Action'. We aim to act as a resource for all organisations that wish to embed climate change and environmental education into their teaching and training. We are looking for students to design frameworks and toolkits that will enable any academic or community member to confidently educate others on the importance of SDG 13. This project will also show how SDG 13 influences all the other Goals and is a catalyst for creating jobs of the future.

Expected Outcomes:

1. A report highlighting the importance of SDG 13, and its influence across all other SDGs; factual justification of the statement.

2. A guidebook for any enthusiast to introduce SDG 13 to their relevant audience (Academia, Community, Corporate, etc).

3. A forecast of how SDG 13 will drive jobs creation/market.

Deliverables:

- Report of SDG 13 influence across other SDGs (adapted to be used by any interested party);
- List of case studies of effective SDG 13 educational tools (including, but not limited to, online tools, calculators, materials, etc);
- Engaging guidebook on SDG 13 (for the audience of your choice – for example, youth groups, educational organizations, corporates, media, etc.);
- Analysis of SDG 13-triggered jobs across all sectors, with a forecast horizon of 5 years.

Is this project reoccurring? Yes

Which sector is this project focused on? Intergovernmental Organizations

Which skills might be required for the successful delivery of your project?

Literature Reviews

Market Research

Product Developing
